10001		Filtermaster Fresh Water Pool Purifier

This new product represents the latest swimming pool purification technology in the world. This technology enables you to sanitize your pool with fresh water rather than adding different minerals or chemicals. This system enables you to truly enjoy the benefits of a fresh water pool - no other system can offer this.

As your pool is classified as freshwater and on the basis you maintain a low chlorine level, you are able to use the pool water to irrigate your garden/lawns.
