**FULLY NEW ZEALAND OWNED AND OPERATED**

# SWIM JET SYSTEM

TRANSFORM YOUR SWIMMING POOL INTO A FUNCTIONAL SPORT AND LEISURE ZONE

- Each SwimJet is powered by Filtermaster 3hp single phase pump.
- Each pump draws from a pair of safety suction fittings and returns to a SwimJet.
- Each SwimJet has a venturi air control to aerate the water flow to increase the turbulence of the water returning to the pool if required.

The Filtermaster SwimJet system is proven as both powerful and reliable for years of family fun for both adults and younger members of the family.
